Bennett Woo,

I really appreciate you taking time out of your busy schedule to tackle incentive fraud at Uber to meet with me for our interview.

Thank you so much for providing the team overview, problem scope, and organizational structure – that really helped to place a framework around Risk, and every interviewer afterwards used your chart as a guide. Additionally, I really enjoyed the genuine, thought-provoking and wide-ranging questions you posed about my various projects in the fraud ecosystem while at the Service; both from a technical and quantitative perspective, as well as a philosophical perspective on the compliance-fraud programs.

To add to that note, here's one of the projects I worked on that I think you (and possibly Yi from an account abuse perspective) would be really interested in. FOIA declassified after sentencing and my testimony. Easily one of the more rewarding aspects of the job:

- Here's where the analysis ended up:

I look forward to an opportunity where we may collaborate again in the future.

Sincerely,
